- QUOTES

"Wonderful chalk tools! You can almost taste the dust!"

Mickey Paraskevas, Illustrator and Creator of the Maggie and the Ferocious Beast TV show.

"Drawing Pad is a fun and easy to use iPad art app for kids and adults alike. It has very visual menus giving you instant access to a broad range of useful art tools. There are amazing features for kids including downloadable colouring books and additional advanced features for more ambitious artists."

Kyle Lambert - Artist - www.kylelambert.com

- Apple Pencil support for pressure and tilt

Monster Physics®

\$1.99

- ▶ 2012 Editor's Choice Award! - Children's Technology Review
- ▶ "a fun, educational app that hits the mark with kids" - The iPhone Mom

Monster Physics® is a unique building app that lets you play with physics! Build and operate your own car, crane, rocket ship, plane, helicopter, tank and more!

BUILD IT:

Set your imagination free! Build intricate, working contraptions with over 68 different parts including wheels, rockets, propellers, cannons, magnets, claws, wings and more. Choose from different materials including metal, wood, plastic, rubber and ice. Connect parts together by welding them, drawing a rope or chain between them with your finger or using special dynamic joints to bring them to life.

Once your invention is complete, Monster Physics® will render it with its built-in physics engine and let you actually operate your creation in real time. You can drive your car, operate your crane, guide your rocket into space or fly your helicopter! The possibilities are limited only by your imagination.

SOLVE IT:

Think outside the box! Monster Physics® comes with 50 missions for you to solve including simple tutorials as well as mind-bending challenges. Many of the missions are open-ended and can be solved with a wide variety of different solutions so you can play them over and over again. Players will learn problem-solving and creative-thinking skills while having tons of fun.

NGAkids Art Zone

<https://www.nga.gov/education/kids.html>

(Website and iPad app)

NGA
kids

The NGAkids app provides an immersive experience as children visit a virtual art museum and explore a variety of works spanning more than 300 years of art history. High-resolution graphics, careful attention to detail, and exposure to a variety of subjects, painting styles, and techniques help convey an authentic understanding of the artistic process and reinforce their familiarity with the fundamental elements of art. Although not games in the traditional sense, unexpected animation and audio features enliven the programs and help make learning fun.

There are 10 sections to explore:

- Portrait
- Landscape
- Seascape
- Still Life
- Action Painting
- Exploring Color
- Color Field
- Collage
- Sketchbook
- My Art Gallery

Works of art by a wide range of artists—including Edward Hicks, Fitz Henry Lane, Berthe Morisot, Claude Monet, Vincent van Gogh, Mark Rothko, Josef Albers, and Robert Rauschenberg, along with several anonymous American naive painters—serve as inspirational models
